

Evaluation:

I have learnt many things about the 60's and 70's such as how they used to dress and style their outfits for an everyday outfit, fancy outfit and much more interesting outfit. I also got to see how they would style their hair and how they did their make-up. Those times seemed like that they were very fun and enjoyable as they had lots of fun activities and everyone spent time together and had lots of fun. Some things from the 60's and 70's still apply to some people's lives as some have their home or certain room decorated like the 60's and 70s. Some even use the style of clothing still to style their outfits. I've learnt lots about the 60' and 70's that I didn't know before during this project.

I feel like my mood board was quite good as I added lots of things and important things of the 60's and 70;s but maybe I could've chose a certain colour scheme or/ and arranged it in a certain way to look more organised, however overall I am quite pleased with how it has turned out.

For the second task I decided to re-create the film poster for the famous movie Jaws, I feel like it was alright as I don't usually do that kind of stuff on the laptop, I feel if I had a app to edit it I could've blended some objects to the background to make it look better. So overall it could use quite a bit of improvements.
